## EXPERIENCE

**Amazon**                                                July 2022 - Present
*Software Development Engineer - **Just Walk Out Technology***          *Seattle, WA*

· Spearheaded store creation automation, enabling the rollout of over 200 Just Walk Out (JWO) stores.
· Managed post-purchase order handling including receipt indexing and returns tool.
· Coordinated with multiple teams to implement data encryption for post-purchase data consumption, ensuring enhanced security and compliance.
· Launched tools in 3 new countries.
· Developed payment integration for 3rd party payment processors, such as Stripe.
· Removed and deprecated legacy code for things like Web Entry Key and order indexing APIs.
· Collaborated with third-party suppliers to customize their experience of JWO technology applications. For example, customizing receipt layouts.

**Expedia**                                                June 2021 - July 2022
*Software Development Engineer*                                      *Seattle, WA*

· Developed features for Virtual Agent platform aiding suppliers in communication.
· Contributed to internal software like feature flagging tool and itinerary indexing.

**Freelance Software Engineer**                              Nov 2020 - June 2021
*Independent Contractor*

· Developed software for daily operation data tracking for a transportation company.
· Created invoicing tools and other automation, reducing administrative workload from 4 hours a day to 15 minutes.

**Amazon**                                                    Summer 2020
*Intern*                                                         *Seattle, WA*

· Improved data visualization for Devices QA.

## EDUCATION

**Pacific Lutheran University**                                    *Tacoma, WA*
B.S. in Computer Science
GPA: 4.0
